**DETAILED ACTION**

***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action, when taken together with the changes made to the language of the claims via the latest amendment is persuasive and, therefore, the finality of that action is withdrawn.

2. Claims 44-63 were pending at the time of the previous Office Action. By the latest amendment, claims 44-49, 51, and 54-63 have been cancelled and claims 50, 52, and 53 rewritten in independent form. Therefore claims 50, 52, and 53 are pending and have been examined.

***Allowable Subject Matter***

4. Claims 50, 52, and 53 are allowed.

5. The following is an examiner's statement of reasons for allowance:

The closest prior art in the field, McManis, 5,692,047, fails to teach the combination of features of the applicant's invention as set forth in the independent claims, particularly including; executing an executable program in a tamper-resistant execution space at a user site, where the execution is dependent upon the evaluation of the digital certificate of the applicant at the user site, where the certificate certifies that

Art Unit: 2137

the executable program operates in the manner described in the specification of the applicant, and where the certificate and specification are created at the certification authority of the applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
